

MOKO SMART

Precision Navigation Reliable Everywhere

L04 Navigation Anchor

Introducing the new arriving L04 navigation anchor, a cutting-edge device designed to enhance indoor navigation across various environments. With a robust lifespan exceeding 10 years, L04 ensures long-term reliability and performance. It offers flexibility with two battery options for versatility and supports the expansion of temperature sensor for condition monitoring. Suitable for shopping malls, hotels, hospitals, warehouses, and beyond, its durability, flexibility and advanced features enhance operation efficiency and user experience.

Application

Shopping Mall

Hotel

Hospital

Warehouse

10 years lifespan

Supports Bluetooth
long-range feature

Flexible installation
options

support

General Specs

Dimensions (mm):	73.8*46.3*26.5
Color:	White
Installation:	Screw with bracket Sticker
Connectivity:	BLE 5.1
Transmission range:	150m in legacy mode 350m in Long range mode
Sensor:	Temperature sensor (optional) accelerometer sensor (optional)
Battery capacity:	5200mAh (Li-SOC12) / 3200mAh (Alkaline) Replaceable battery
Lifespan (default settings):	10+ years (Li-SOC12), 5 years (Alkaline)
Operating temperature:	-20°C/60°C (Li-SOC12), 0°C/40°C (Alkaline)
Certification:	FCC/CE/RoHS/REACH
